Appendix 3

Display of Macro definitions

When the display macros command is used you will see the various keys that have been assigned. Any characters in the table shown in Appendix 1 will appear normally but in addition to this you may see numbers contained within ^ characters. There is a number for each possible function in the word processor. The following is a list of those numbers and what they mean together with the key combination that is used to achieve the function.

Number	Keys used	Description
512		Set or go to marker
513		Swap adjacent characters
