Solaris™ 2.5 Sun™ patch analysis

This analysis is based on the Sun Solaris 2.5 Patch Report Update of 16 Jan 97. It does not cover all Tadpole-Cycle patches as about 2/3 are to fix problems in Tadpole-Cycle modules.

NOTE: Patch marked as **DO NOT INSTALL** must NOT be install on SPARCbooks. The fixes included in these patches have already been done during development at Tadpole-Cycle and installing the patch would remove other Tadpole-Cycle modifications. Patches marked **Not Applicable** contain modules that are never used on SPARCbooks. Installing the patch would not make any difference. Patches marked **Use Txxxx-yy** require the Tadpole-Cycle patch Txxxx-yy to be installed instead. Patches marked **Work in Progress** are in the process of being integrated into equivalent Tadpole-Cycle patches. Installing the patch would not make any difference on a SPARCbook.
