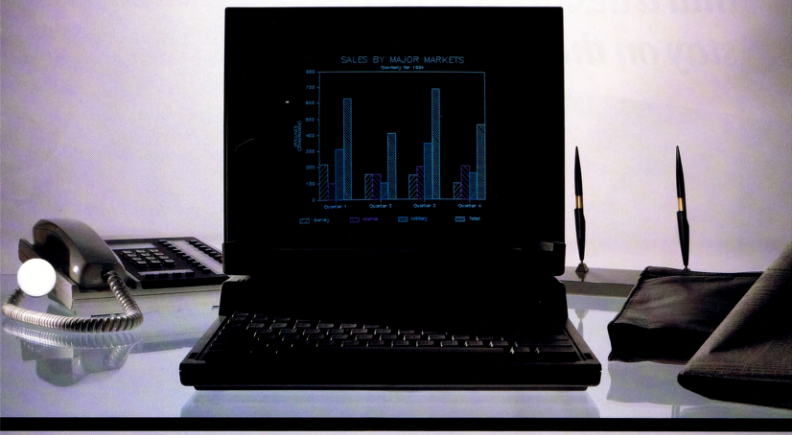
WHERE IS THE DESKTOP PC ULTIMATELY GOING?



ANYWHERE YOU WANT.

At a moment's notice, the computer you saw attached to the monitor on this desk transforms into a full-function portable with LCD that slips easily into any of these cases.

Anywhere business professionals go who want to use integrated packages like Enable,™ Ability,™ or Framework II,™ or project management tools like Timeline,™ Harvard Total Project Manager™ and more.

Anywhere writers or students go who want to use popular word processing packages like WordStar,® MultiMate,™ Word Perfect,™ Bank Street Writer,™ Microsoft® Word, PFS®:WRITE, PFS:PROOF and more.

Anywhere financial professionals go who want to use spreadsheet programs like Lotus™ 1-2-3,™ PFS:PLAN, Framework® and SuperCalc® or personal finance software like Managing Your Money™ and more.

Anywhere productive professionals go who want to use tools like SideKick® SuperKey,® Turbo Lightning,® ProKey or Ready!,® or who want to communicate via software like Crosstalk XVI,® Microsoft Access and more.

Anywhere analytical professionals go who want access to databases like dBASE II® dBASE III,™ R:base™ 5000, Reflex,™ PFS:FILE, PFS:REPORT and more.

Anywhere creative professionals go who want to communicate visually with graphics software like [illegible]oft Chart, PC GRAPH, Freelance, Print Master,™ Newsroom™ and more.

Anywhere self-improving professionals go who want to learn with training packages like Teach Yourself,™ Lotus 1-2-3, Symphony,™ Framework, Multiplan™ and more.

Anywhere programmers go who want to use languages like Turbo Pascal® Quick BASIC,™ C Compiler, FORTRAN Compiler, Macro Assembler, Microsoft's BASIC Interpreter and more.

Anywhere adventurers go who want to play games like Flight Simulator, Jet,™ Gato,™ Zork™ I, II or III, Hitchhiker's Guide to the Galaxy,™ Mind Forever Voyaging,™ Spellbreaker™ and more.

Anywhere anyone wants to take their desktop PC: To a meeting down the hall, across town or around the world.

INTRODUCING THE TOSHIBA T1100

The computer that dispels the old-fashioned notion that a desktop PC has to stay on the desk.

By packing desktop-sized performance into a slim, 9-pound package. For the first portable without the compromises.

It's *not* a plaything. And it's *not* a hefty giant with a handle.

It's better than any "laptop" computer you've ever seen.

Its the Toshiba T1100. Tomorrow's desktop computer. For today. $1999 complete.

Superb on your desk.

Consider the elegance of a full-function, IBM®-compatible computer that not only takes up remarkably little desktop space, but slips conveniently into a drawer when not in use.

You'll find the T1100's built-in, full-size LCD to be *extraordinarily* crisp. Toshiba's advanced technology gives you higher resolution, plus an adjustable tilting display for crystal-clear, high contrast viewing.

Or connect the Toshiba T1100 to an RGB color monitor, and presto: You have a business graphics workstation, with enough power to run the most demanding applications.

The T1100 comes with the MS-DOS™ operating system, for access to today's fastest-growing business software library.

So you can take advantage of great packages like Lotus 1-2-3, dBASE III, Sidekick, WordStar, PFS:WRITE and Reflex.

You'll love working with the T1100's full-sized 83-character keyboard, while a built-in 720K 3.5″ floppy disk drive lets you easily store all your data. Toshiba also offers external 3.5″ or 5.25″ floppy disk drives at highly affordable prices, to store more data, or to transfer data to or from other PCs. And our terrific 3-in-One™ printer family will make your T1100 output look as good on paper as it does on screen.

Superb on the road.

Toshiba packed all this desktop performance into a slim, foot-square chassis, weighing just 9 pounds!

Carry the T1100 in its own handsome carrying case, or slip it into your briefcase or bag: It goes wherever your work takes you – without sacrificing an *ounce* of functionality.

The T1100's built-in rechargeable Nicad battery keeps you in power for up to 8 hours at a stretch, so you can be equally productive in transit or at your desk. A built-in warning light lets you know when the battery begins to run low, to ensure that all your valuable data stays safe.

You don't have to go back to the office to get the latest report, either: Stay in touch with headquarters or tap into information services with the T1100's optional modem.

One keyboard at work, at home, in transit. Simpler. More convenient. More compatible.

Finally, all the features you've been waiting for in a full-function portable desktop computer:

IBM compatibility. A sharp, readable full-sized screen display. RGB, external disk drive and parallel ports. Battery power for up to 8 hours of work on the road.

All in a desktop that slips easily into a drawer or briefcase.

And all at an irresistable price.

Whether it's your first or second computer, the Toshiba T1100 is where the desktop PC is headed.

Toshiba's advanced CMOS and proprietary gate array LSI technology make it all possible. The T1100 is backed by our reputation for high quality electronics, and by our total commitment to excellence – for over a hundred years.

Tomorrow's desktop computer. From the company that's been in touch with tomorrow since before you were born!
