TOSHIBA

T1900/T1950 Series
Personal Computers

"It puts me on top right from the start."

Getting a head start is rare these days. Starting in front is almost unheard of. But that's the feeling you get when you own a Toshiba notebook. The confidence that comes from knowing that what's standard for Toshiba means leadership for the industry. The T1900/T1950 Series offers the most sophisticated standard notebook computers available. Within their stylish casing lies a world of increased productivity and freedom that goes with the best name in notebook technology. Standard features include Intel 486 processor technology with intelligent power management; high capacity hard disks for today's large programs; fast colour screens that do graphics justice; and a keyboard and clip-on mouse that are easy to use. These affordable notebooks also offer on-line connectivity and flexible expandability thanks to their PCMCIA 2.0 slot – a feature not found on many more expensive notebooks. With the PCMCIA 2.0 slot, you buy a Toshiba today and you're already investing in tomorrow. In the sleek, modern lines of the T1900/T1950 Series you can see the shape of the future, not a copy of the past.
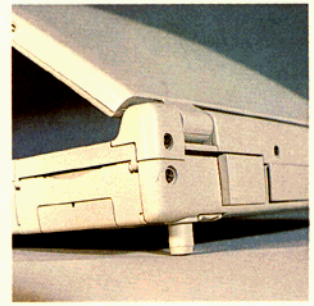

Take it from Toshiba

Improved screen technology for greater contrast and faster response

The new Microsoft BallPoint® V 2.0 with QuickPort™ is the ideal mouse when you're on the move

Industry-standard PCMCIA 2.0 mobile expansion and communication in handy credit-card format

Round, smooth styling, sliding doors, and pop-out feet that raise the keyboard to the ideal angle
